

# **Environmental Policy**

---

*AVK Industrial Products is committed to conducting its business in an environmentally sound manner. AVK will continually work toward compliance with all applicable laws and regulations, and wherever practical, put into practice its concern for the environment at a company level through the implementation of policy, and at an individual level through continuous education of its members. This will be accomplished by environmental consciousness in the selection of equipment, processes and procedures, and the continued training of AVK personnel. Through the continual improvement of the environmental management system in place, AVK is committed to the reduction of pollution and its environmental footprint.*
